There are multiple chances to win this season, following is an explanation of each:

Each player will randomly be assigned a team sheet (Sample shown below). Based on your weekly assigned team's success or failure will determine your winnings. FIRST, your assigned team must WIN !!! or TIE !!! (End of game score - includes overtime if any) to qualify to win in the winners categories shown below. Of the winning teams, only four (4) will be a category winner. The losing teams which played the four category winners will be a category loser and receive a loser's share of (\$6.00) each. In addition using your assigned team sheet to track your won / lost record and points could win you additional monies.

The N.F.L. season will be 17 weeks long. Each team will have one bye thus actually only playing 16 games. Each player will be in the running 16 out of the 17 weeks, with the byes being distributed equally.

## **ZERO (0) CLUB**

**Each week the zero club is worth \$6.00**

- 1. If your weekly assigned team is held scoreless (zero (0) points), you will win the \$6.00 unless an other team(s) is held scoreless, which in that case you will split the \$6.00 among all scoreless team holders.**

**Example - Giants 17 - Redskins 0  
Ravens 20 - Bengals 0**

**The Redskins & Bengals team holders will receive \$3.00 each.**

- 2. In the event no team is held scoreless then the following week the zero club will be worth \$12.00. In other words the zero club will accumulate until a team is held scoreless. Then the zero club re-sets to \$6.00 once again.**
- 3. In the event the zero club at the end of the week seventeen still has money not won, then the zero club will continue on into the playoff system and all playoff team holders will have a chance to win the zero pot.**

**PLEASE NOTE: The zero club amount accumulated at the end of week seventeen no longer accumulates when in the playoff system.**

- 4. In the unlikely event the zero club is not depleted during the playoffs, then the LOSER of the SUPER BOWL will win the amount left in the zero club.**

## Part B

### WIN/LOSS Record Tracking Sheet

### The \$480 four (4) Quarter Club

(You could win it all!)

### RULES

Here is how it will work. Use your assigned 17 week team sheet in order as assigned and break it down into 4 quarters. If a bye comes into play then the next following team will constitute your quarter. Example below:

#### Wk # Assigned Team

1 - Texans		10 - Bills	
2 - Colts	Quarter #1	11 - Jets	Quarter #3
3 - Steelers		12 - Ravens	
4 - Packers		13 - Seahawks	
*****		*****	
5 - Redskins		14 - Vikings	
6 - * bye *	Quarter #2	15 - Saints	Quarter # 4
7 - Broncos		16 - Patriots	
8 - Jaguars		17 - Chargers	
9 - Bills			

There are multiple chances and ways to win with a (**CATCH 22**).

A – Each quarter is worth \$120.00. Anyone going 4 & 0 or 0 & 4 in any of their 4 quarters will qualify to divide equally into the monies for that respective quarter.

B – If a quarter goes by with no winners then the previous quarter \$120 will add to the next quarter making it \$240.

C – If at the end of the 4<sup>th</sup> quarter there are monies not won, then everyone with a ending 8 & 8 season record in Part A of the WIN/LOSS Record and Score Tracking Sheet will qualify to split the monies equally.

D – Now for the CATCH 22

Anyone who post a perfect season either a 16 & 0, a 0 & 16 record or wins in all four quarters with a mix of 4 wins or 4 losses in any order with their assigned teams will win or split in case of identical records the TOTAL \$480.00 and eliminate any winners that qualified in A, B, or C.

Tie Breaker Rule – In case of a tie game at the end of overtime, the Highest Alphabetical Standing Team will be given the win and the other team the loss.

Example – Saints 20 – Seahawks 20 at the end of overtime.  
Seahawks will be given the win and the Saints will be given the loss.

## THE 37 CLUB

1. If the team your assigned during a specific week scores exactly 37 points (win or lose) end of game score including overtime you will win \$18.00, unless another team scores exactly 37 points, then you will split the money. Note: The “37 club” is not in effect during the playoffs.

NOTE: ONLY THE PERSON HOLDING THE TEAM SCORING 37 POINTS WILL WIN THE \$18.00. The \$18.00 will not be split with the person holding the second team of the game.

2. In the event no team scores 37 points exactly, then the following takes effect:

The game with the final score, (Total Points Scored) closest to 37 points will win the club. BOTH team holders will split the \$18.00. In the case of more than one identical game score, the money will be split.

If two games have a score with an even split above and below 37 points, the one under will win.
